# Nixon Peabody Brand Guidelines

NP POSITIVE IMPACT

# Why the brand matters

Our brand is much more than a logo and some pretty colors.

**It's our promise to our clients, our people, our communities, and to our firm.**

It's both what we say and how we look. It comes to life in how we act both internally and externally.

**In fact, our brand has to be true to us internally, for it to be true to others externally.**

It helps attract and retain talent, drives growth, and builds financial value. And it helps give us license not only to operate but license to lead in our industry.

**Represents**  
our promise to customers,  
communities, and teams

**Clarifies**  
and forces focus across  
our organization

**Moves**  
us past transactions  
to deeper relationships

**Attracts**  
top talent and engages  
and aligns employees

**Builds**  
financial value

**Reinforces**  
license to operate  
and license to lead

# Logo system

The Nixon Peabody logo system consists of two variations with the Spark. Both a full "Nixon Peabody" logotype and an abbreviated "NP" version of the logo mark are available for use on all materials. The full Nixon Peabody logotype version is the preferred standard logo for use in all applications; however, the NP version can be used in-house and for existing clients working with the NP brand.

Nixon Peabody version  
Black

NP version  
Black

# Logo system

The Nixon Peabody logo collection also contains simple white (or reverse) versions of both Nixon Peabody and the NP version.

Nixon Peabody version  
White

NP version  
White

# Logo system | clear space

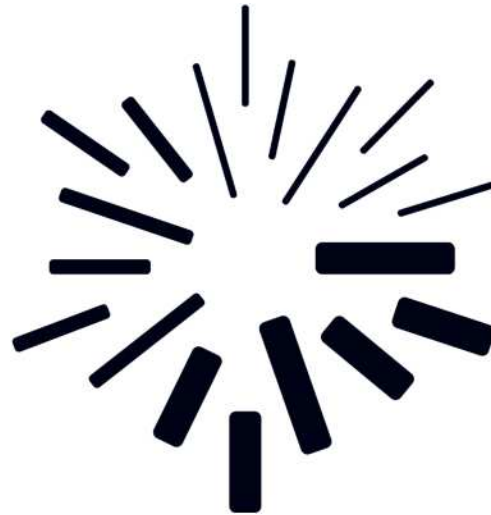

Other elements on the page should not intrude or obscure the Nixon Peabody logo. To avoid any issues, please follow the recommended clear space outlined here to allow for the minimum space required around each logo element.

Clear space for each logo is determined by creating a square unit box based on the size of the bottom spark symbol

# Logo system | Spark

The Nixon Peabody spark reflects the energy and passion we bring to our work and it contains enormous storytelling potential. This symbol can be used separately for limited usage only.

Spark symbol only

# Logo system | color

The standard Nixon Peabody logo coloration consists of a light colored Spark with the Nixon Peabody (or NP) logotype in the darker color.

Nixon Peabody version  
Light Spark / Azure

NP version  
Light Spark / Azure

# Logo system | color variations

The entire Nixon Peabody logo collection consists of three primary colors for both the Full Name and NP versions.

NP version  
Light Spark / Verde

NP version  
Light Spark / Cerise

# Logo system | incorrect usage

The Nixon Peabody logo collection should never be altered. Follow these simple rules so that the NP brand is presented consistently across all media.

Do not alter or rotate the placement of the logotype or spark radius

Do not place the logo on a busy background where the logo is not legible

Do not distort logo or elements in any direction

Do not add effects such as drop shadows, embossing, or gradients to the logo mark or spark

Do not use colors on the logo mark other than the specific callouts

Do not swap the color positions on the logo mark and spark

# Color spectrum | digital

**Digital color palette** is used across all branded materials, including website, Word documents, PowerPoint presentations, emails, marketing brochures, social media graphics, etc.

## Primary

Azure  
#28519D  
RGB 40 81 157

Verde  
#188369  
RGB 24 131 105

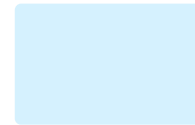

Cerise  
#D33867  
RGB 211 56 103

Plum  
#5F2C8F  
RGB 95 44 143

## Secondary

Light Azure  
#D5F1FE  
RGB 213 241 254

Light Verde  
#D1F4EC  
RGB 209 244 236

Light Cerise  
#FAD8E3  
RGB 250 216 227

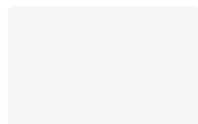

Light Plum  
#E7D8F7  
RGB 231 216 247

## Base (gray)

White  
#FFFFFF

Frost  
#F6F6F6  
RGB 239 240 241

Dove  
#E2E4E4  
RGB 226 228 228

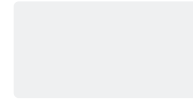

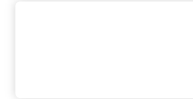

Gray  
#596267  
RGB 89 98 103

Black  
#1A1B2E  
RGB 26 27 46

# Color spectrum | print

**Print (CMYK) color palette** should be used for special print projects like firm brochure, high visibility publication ads, and tradeshow materials.

|                                                                                   |                                                                                   |                                                                                   |                                                                                    |                                                                                     |                                                                                     |                                                                                     |                                                                                     |                                                                                     |                                                                                     |

# Typography

Typography plays a critical role in maintaining Nixon Peabody's look for consistency and stability. Our brand utilizes two main type families: Tiempos Headline & Soleil. Together, these families create strategic hierarchy which helps shape the overall brand narrative.

**Tiempos Headline** is an effortlessly modern serif family specifically designed for larger headline sizes. It's robust and clear, striking a balance between practicality and elegance. It should be prioritized for all headlines across branded materials.

ABCDEFGHIJKLMNOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxyz  
1234567890?!@#\$%^&\*()

**Soleil** communicates reliability, tranquility, and freshness. It reads best in lengthier blocks of copy and displays nicely at smaller sizes. It should be prioritized for all body copy, disclaimers, and most text links.

ABCDEFGHIJKLMNOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxyz  
1234567890?!@#\$%^&\*()

# Typography | alternative

Wherever the Soleil and Tiempos font families cannot be used, Arial and Palatino Linotype are the backup alternate font families for the NP email signature as well as the PowerPoint presentation templates.

ABCDEFGHIJKLMNOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxyz  
1234567890?!@#\$%^&\*()

ABCDEFGHIJKLMNOPQRSTUVWXYZ  
abcdefghijklmnopqrstuvwxyz  
1234567890?!@#\$%^&\*()

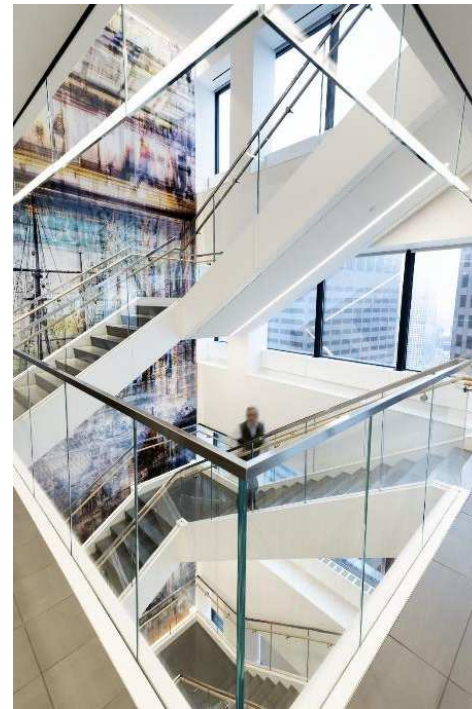

# Image principles

**Consistent photographic and illustrative style is an important asset to our brand.**

We aim to ensure that our visual identity is reflective of a human-first and authentic experience.

Thematically, the photography used across all firm branded materials should collectively achieve two main goals:

- 1 Capture the authenticity of Nixon Peabody's people and spaces
- 2 Reflect the inclusive, diverse and global culture Nixon Peabody has to offer

# Imagery dos and don'ts

## Photography style

---

- ✓ Colors should be natural, crisp, and—whenever possible—nod to tones found in the brand palette
- ✓ Always source images that are authentic and realistic to the Nixon Peabody brand
- ✗ Avoid highly saturated, highly filtered, and highly stylized
- ✗ Avoid sourcing images that are too artistic, or which showcase odd or unnatural angles/perspectives

## Composition

---

- ✓ Frame skylines, buildings, people, and other subjects to be the main focal point, still allowing ample negative space to give a modern and airy feeling
- ✓ When featuring people, make the subjects the focal; they should stand out crisply from their backgrounds
- ✗ Avoid images where the scenery overwhelms the subjects (especially in city, building, or industry-focused shots)
- ✗ Avoid sourcing images where the background is too busy or distracts from the main focal point

## Environment & subjects

---

- ✓ **Use NP-owned photos featuring attorneys and staff**
- ✓ Subjects should look natural and authentic
- ✓ Look for moments where people are engaged in a spontaneous action or reaction
- ✓ Skylines and/or buildings should capture cities that showcase current Nixon Peabody office locations
- ✗ **Avoid using stock photos featuring people; do not use face photos of non-NP personnel**
- ✗ Avoid using images where talent is looking directly at the camera; talent should not look staged or overly posed
- ✗ Avoid using images that aren't relevant to Nixon Peabody office locations

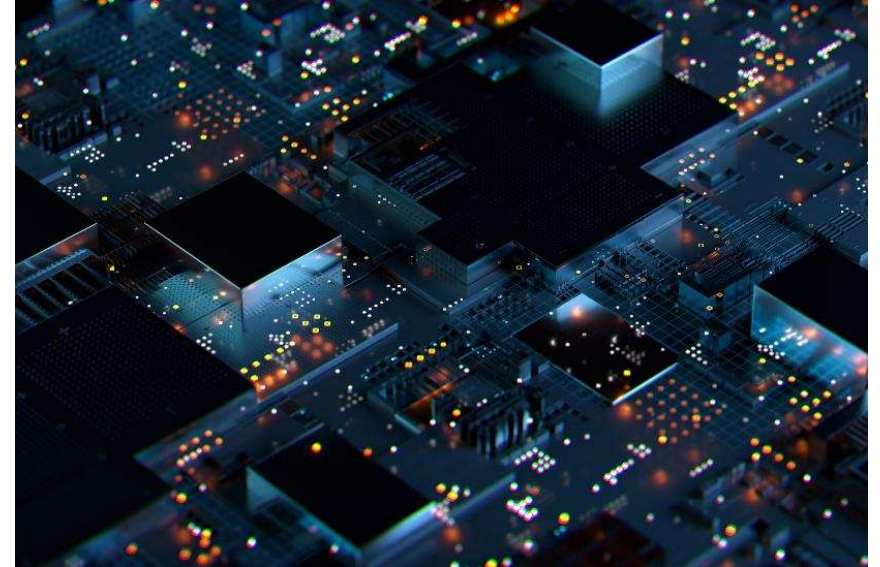

# Photo library | people

Whenever possible, feature photos of our people. We have a selection of NP-owned photos using our attorneys and staff as models. **Do not use face photos of non-NP personnel, including stock photos.**

# Iconography

**Iconography is used to represent simple concepts and help guide users through the experience.**

All icons are simple, clear and should always enhance the user experience. In Nixon Peabody's digital design system, there are two types of icons: utility and storytelling.

**Utility icons** are used to communicate simple ideas and user tasks; they can inherit any color from the brand palette, so long as web accessibility standards are achieved.

**Storytelling icons** are used to help illustrate more complex ideas and are generally more detailed; they leverage layered gradients using colors from the brand's primary & secondary color palettes.

## Utility icons (sample set)

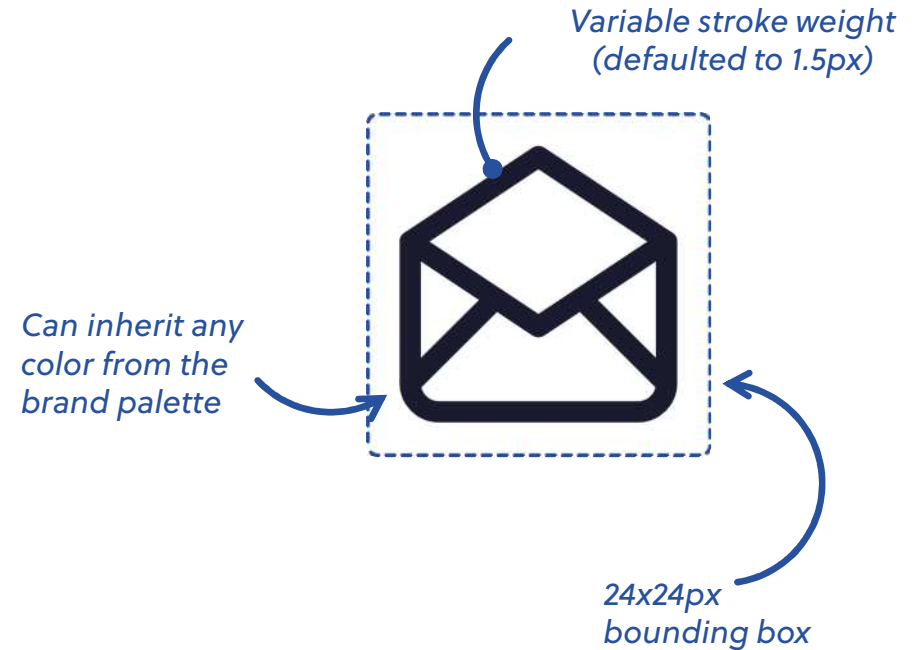

## Storytelling icons (sample set)

# Icon specs

Nixon Peabody's **utility icons** are outlined, slightly rounded, and simplistic in nature. Each is designed to sit within a 24x24px container, and each has a variable stroke weight (defaulted to 1.5px stroke weight, but should flex dependent on need).

All utility icons used in Nixon Peabody's digital component library have been sourced from Tabler, an open-source set of over 2,000 MIT-licensed, high-quality SVG icons. For more information, please see [Tabler's website](#) and their [github](#).

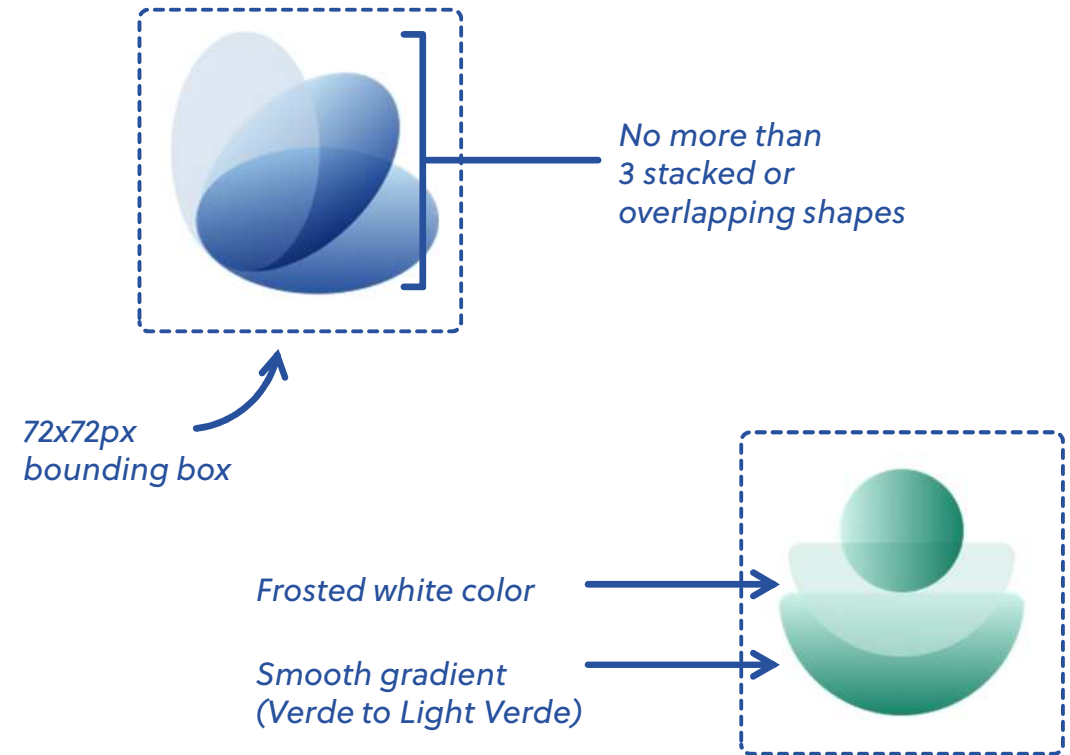

# Icon specs

Nixon Peabody's **storytelling icons** are built using gradients that leverage colors from the brand's primary & secondary color palettes. Each icon is designed to sit within a 72x72px container, and each can display in any of the 4 primary color themes: Azure, Verde, Cerise, or Plum.

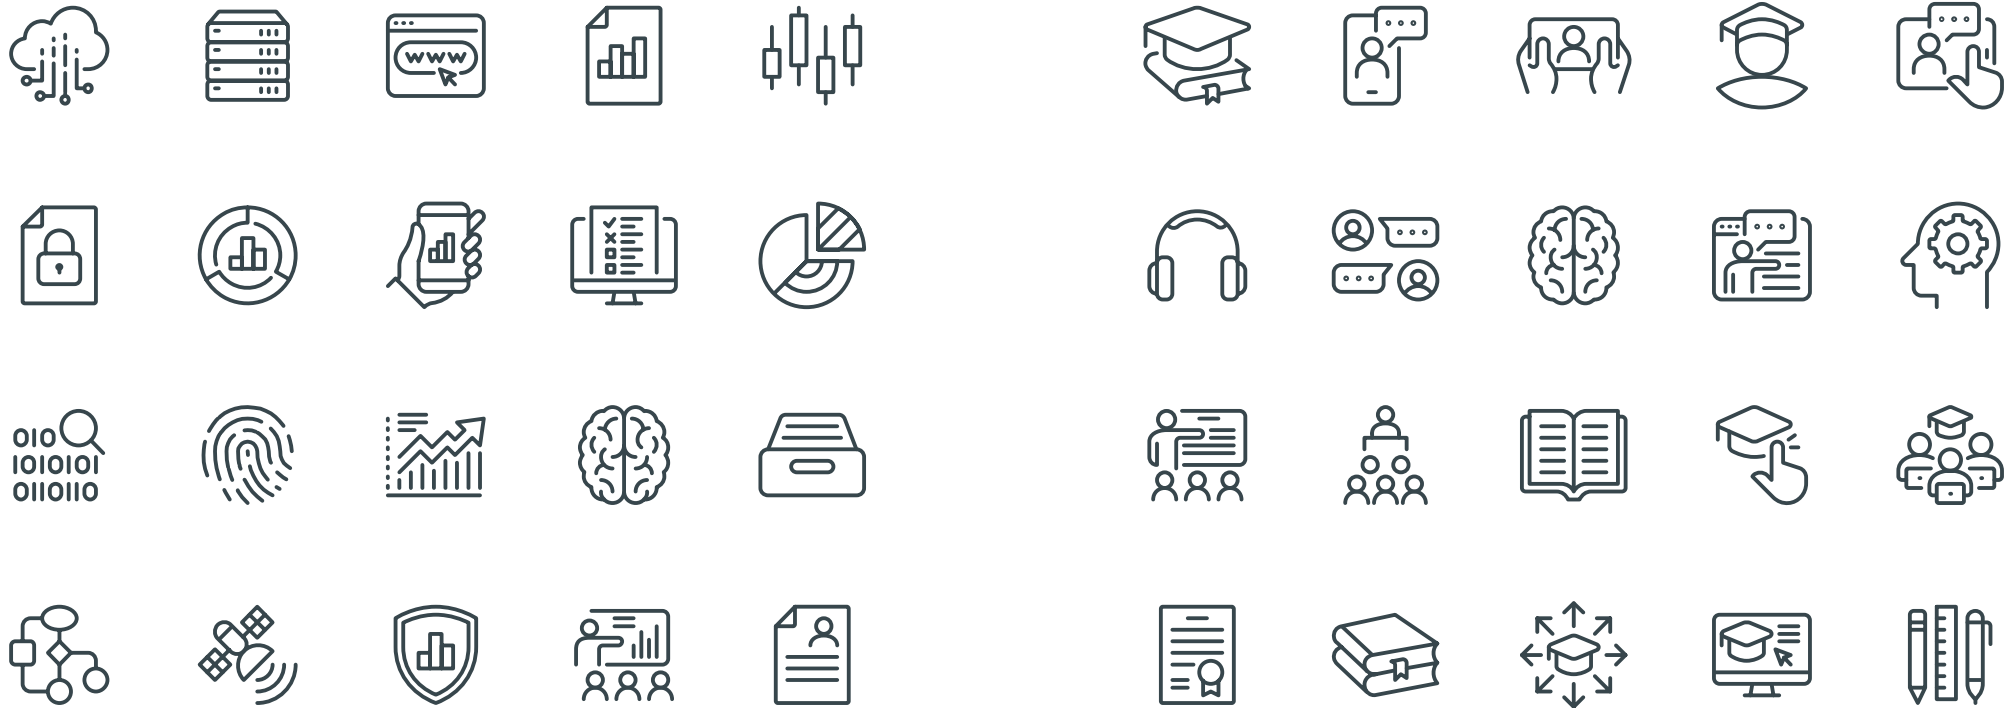

To successfully use & build a storytelling icon, follow these general guidelines:

- / Utilize no more than 3 shapes
- / 2 of those 3 shapes should use a smooth gradient that fades from one primary color (e.g. Azure) to its corresponding secondary color (e.g. Light Azure)
- / The 3rd shape should leverage a frosted white color, in order to create depth and dimension.
